

---

*Click 2 dial extension in Chrome*

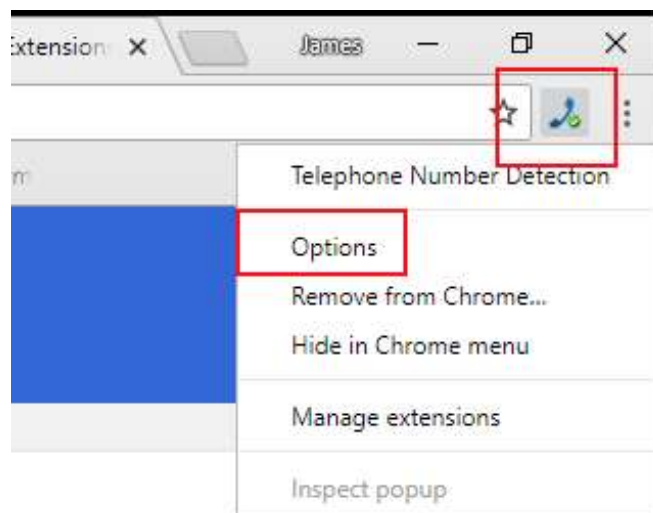

---

1. Download & Add Extension in Chrome:

<https://chrome.google.com/webstore/number-detection>

2. In Chrome, Click the blue icon of the phone. Then click 'options' as pictured below.

- The following menu will be displayed. Click the dropdown box and select protocol 'Tel:'  
Check the checkbox 'Enable Protocol Replacement' and all other checkboxes as pictured below.

- Click Save. If you find currency is being detected as numbers you can adjust the min/max of number length to help filter out this.
- Make sure the extension is enabled  
(Use this option to toggle on and off number detection with ease)

Disabled Icon	Enabled Icon

6. Phone numbers will now have a blue phone next to them. Simply click the number to begin dialling.
