

Summary: This tutorial will teach you how to enable AMI service on a Yeastar MyPBX

Step 1:

Login to your PBX by navigating to its IP address in your favourite browser

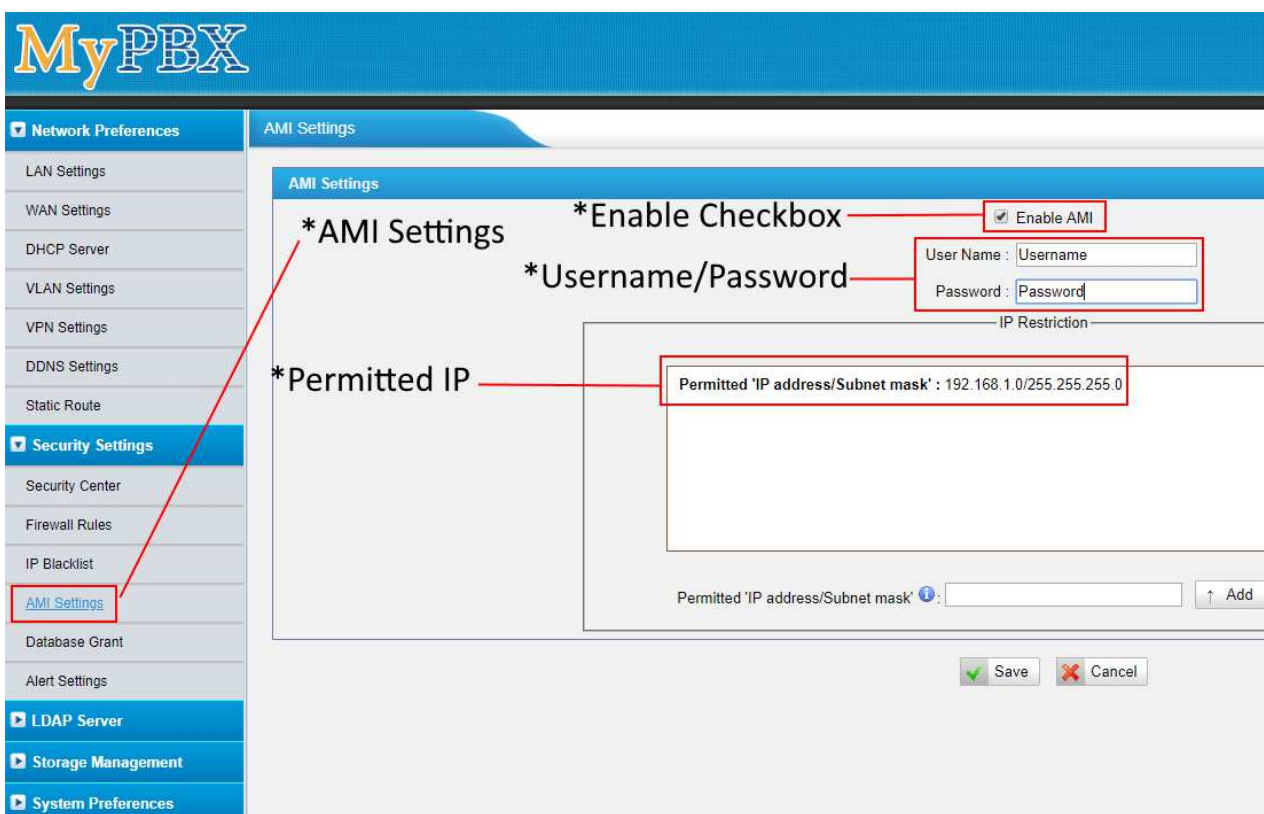

Step 2: Open "System" Settings

Step 3:

In System Settings, enter the AMI settings area by click "AMI Settings" on the left-hand menu

Step 4:

Check the box to enable AMI service and set the Username/Password and the permitted IP ranges

Click “Save”, then “Apply” the changes.
